### **DETAILED ACTION**

1. This office action is responsive to application filed on 10/15/2004. The claims 1-41 are pending and subjected for restriction/election.

A telephone left for Hynman Kelly on 5/22/2006 for restriction election but examiner could not get a reply therefore this restriction election is sent out.

### ***RESTRICTION ELECTION***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, claims 1-36 draw to specifying a plurality of voltage constraints, defining at least one pair of voltage domains in the design and at least one level shifter cell; for each pair of voltage domains, checking whether a signal crossing the voltage domains is connected to a level shifter; verifying the correctness in the design of an existing level shifter; generating a level shifter module for the crossing signal, when the crossing signal is not correctly shifted; and inserting the generated level shifter module in the design.

Group II, claims 37-41 draw to a database of voltage constraints; a code generator generating description language code of the level shifter modules; an insertion unit instantiating and inserting each of the level shifter modules in a respective voltage domain; and a checking unit verifying the correctness of the level shifter modules.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 2825

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
